<div align="center">**Assignment-I: Design and Develop a Static Website using HTML**</div>

Create a fully functional static website using HTML. The website will serve as a platform to showcase your understanding of HTML markup and navigation structure.

Requirements:

Homepage:
- Design a visually appealing homepage that captures the essence of your website's purpose.
- Include a clear and concise introduction to the website's content and objectives.
- Implement a navigation menu that allows users to easily navigate to other pages within the website.

About Us Page:
- Develop an "About Us" page that provides detailed information about the organization, business, or individual behind the website.
- Include sections such as mission, vision, history, team members, and any other relevant details.
- Use appropriate formatting and styling to make the content engaging and easy to read.

Services/Products Page:
- Create a page dedicated to showcasing the services or products offered by the organization.
- Present each service or product in a clear and structured manner, including descriptions, images, and pricing if applicable.
- Ensure that the page layout is visually appealing and highlights the key features of each service or product.

Contact Page:
- Design a contact page that allows users to get in touch with the organization easily.
- Include a contact form with fields for name, email, message, and any other relevant information.
- Provide alternative contact methods such as email address, phone number, and physical address (if applicable).
- Make sure the contact form is functional and delivers messages to the designated recipient.

Navigation:
- Implement a consistent and intuitive navigation system across all pages of the website.
- Use a navigation menu placed prominently at the top or side of each page for easy access.

Design and Layout:
- Pay attention to the overall design and layout of each page to create a visually appealing website.
- Use appropriate colors, fonts, and imagery to enhance the user experience and convey the brand identity.
- Maintain consistency in design elements such as headers, footers, and content blocks throughout the website.

Evaluation Criteria:
- Completeness and accuracy of content
- Organization and structure of web pages
- Navigation and user experience
- Design and visual appeal
- Responsiveness and accessibility

Deadline:
The deadline for submitting the assignment is 20-02-2024.
